

REPRESENTATIVE ACADEMIC CLIENTS

From the dorm to the laboratory, students today demand modern and technologically advanced learning environments. These students expect new, higher quality facilities and infrastructures that satisfy each element of their learning process. It is important to understand that the methods of education are changing, as are the facilities that support them. The academic campus consists of diverse facilities for learning, research, recreation and rest. Students and faculty must be able to optimize the use of these facilities and utilize the resources available to them.

PWI understands that libraries and auditoriums require different attention. Our experience with dorm rooms, classrooms, auditoriums, stadiums, laboratories, science centers, cafeterias, and libraries enables us to provide appropriate solutions for your academic needs. PWI creates flexible facilities that adapt rapidly to changing environments and enable academic administrators to provide the learning environments needed for their students and faculty.
