

REPRESENTATIVE HOSPITALITY/MULTI-USE CLIENTS

Hospitality and multi-use facilities include hotels, restaurants, airports, casinos, convention halls, and shopping centers. These facilities cater to large numbers of people on a continuous basis (some operating 24 hours a day, 7 days week). These industries need to supply constant customer service with limited downtime - making it difficult to cut costs. Facilities must provide safety, comfort and entertainment to extremely demanding customer groups. PWI helps to meet these demands and cut costs by utilizing the maximum amount of space for service, ensuring the safety of building systems, and providing energy utility management.
