

## REPRESENTATIVE PUBLIC/MUNICIPAL/COMMUNITY CLIENTS

Public, Municipal and Community facilities include churches, monuments, public parks, visitor centers, government/municipal facilities, and public libraries. Working with these types of facilities requires experience with public officials, historic preservation, strict codes and regulations and serious time and cost restraints.

PWI has the experience to meet these demands by utilizing the amount of space to operate with optimum performance, ensuring the safety of building systems, and providing energy utility management to help cut costs.
