

REPRESENTATIVE SCHOOLS K-12 CLIENTS

The methods of education are changing, as are the facilities that support them. It is important for these facilities to operate efficiently and not interfere with the learning process. The academic campus consists of diverse facilities for learning, research, recreation and rest. Students and faculty must be able to optimize the use of these facilities and utilize the resources available to them.

PWI works closely with school boards and townships to meet their goals and expectations. Our experience with classrooms, auditoriums, stadiums, laboratories, cafeterias, and libraries enable us to provide the appropriate solutions for your academic needs. PWI creates flexible facilities that adapt rapidly to changing environments and enable academic administrators to provide the learning environments needed for their students and faculty.
